

CrIS – Credit Info Service

“CrIS” company is a credit information agency. A reliable provider of business information in such countries as Kazakhstan, Russia, Ukraine, and other CIS, Central Asian, East European countries.

Credit recommendations in our reports contain relevant and reliable information on the solvency of the checking company. The necessity for credit reports arises in cases where there is no information about the reliability of the partner. The ability of the partner to meet his obligations always comes first in any kind of cooperation. Before you start your business with someone, we recommend checking out a potential counterparty/partner.

- **Standard Credit Report** contains credit recommendations (credit rating and credit limit) based on information received directly from the checking company, official sources (registration data, financial and tax reports, etc.) and from other additional sources (media, Internet, etc.).
- **The In-Depth Report** is intended for a more detailed analysis and a full understanding of the financial situation of the company, additionally, it allows to reveal the hidden reserves of the company that can increase credit rating and credit limit.
- The purpose of **Site Visit Report** is to assess the requested company according to its external characteristics, such as the location of the office, the status of the office, the status of the production base, etc.
